

blinks

Bomb Brigade

Goal

Don't blow yourself up and be the last one standing to win.

You'll need...

3-5 players

...➡ 6 Blinks

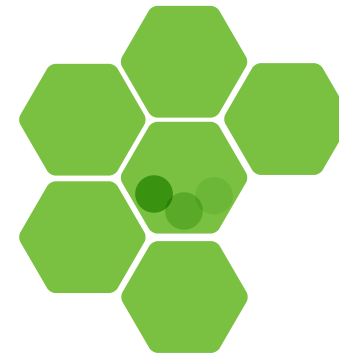

You can play with more pieces and with different bomb configurations; we recommend a simple 6 piece game to start.

Setup

Designate one piece to be the center piece, then arrange 5 Blinks around it. Double-tap the center piece to start the game.

The center will become a ticking bomb, while the pieces surrounding it will become shield pieces.

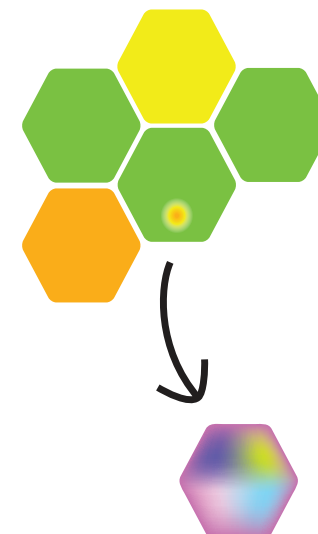

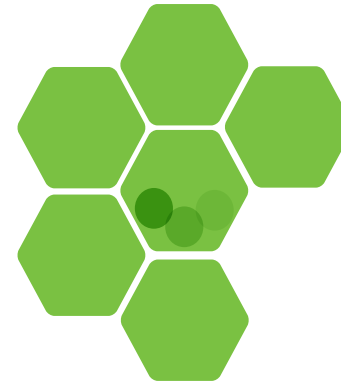

Gameplay

This game plays like Russian roulette. Each player takes turn sparking the bomb. Every time someone sparks the bomb, there is a chance it will explode!

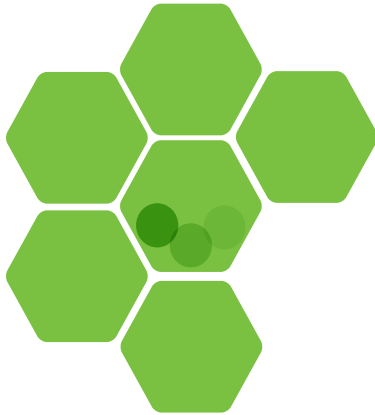

If the bomb explodes while facing a shield, the shield is weakened and the player is safe. The shields weaken every time a bomb explodes on them.

The shields go from **green** -> **yellow** -> **orange** -> **red** -> **rainbow** (which means it needs to be removed from the game)

If the bomb explodes while not next to a shield piece, the player is blown up and out of the game!

Every time the bomb doesn't explode, it will spin around faster and faster until it does. At that point, it will reset back to its default speed.

The game continues until there is one player left, and that person is the winner! Even if there are no shield pieces left, the game should keep going.

There can only be one!

Regardless of whether the bomb exploded on a shield or not, double tap the bomb piece to move on to the next player's turn.
